Premise

Bitcoin was the most relevant scam in the history of money, even more absurd of the that gold thing.

Luckily, now Bitcoin is dead. It died may times, almost 330 according to 99bitcoins.com, I have to be honest, but now is really dead.

I could say: " it's dead because everyone tells it is", but the members of that crazy Bitcoin cult (bitcoiners, bitcoin maximalist and shitcoin minimalist) would say: " I don't care what people says". Anarchists.

So I will argue my statement and I will also prove that US dollar is a better form of money, even if an individual of sound principles and average intelligence would not need my explanation.

Let's proceed with order with a little bit of history.

As you probably know, exchanges of value between individuals began with barter. I produce a commodity A, you produce a commodity B; if I need B and you need A we can exchange our products.

But there is a problem, and it is called double coincidence of wants.

Double coincidence of wants means that the both the parties have to agree to sell and buy each commodities. The problem is caused by the improbability of the wants, needs, or events that cause or motivate a transaction occurring at the same time and the same place.

So we found something else: commodity money.

Commodity money consists of objects that have intrinsic value, durability, and, often, scarcity.

But there was a problem. People began holding these commodities, especially gold, instead of spend them and make debts with the central authority!

We had to find something else.

Why didn't we represent these commodity with paper? Oh, we did!

And even better. In 1971, after incredible research on how to limit the purchasing power of the individual and concentrate it in the hands of the State, finally United States President Richard Nixon, with his Nixon Shock measures, decided for an unilateral cancellation of the direct international convertibility of the United States dollar to gold.

The State won.

Or not?

In 2008 a unknow scammer, named Satoshi nakamoto, probably under the influence of drugs, gave birth to what seemed initially only an idea that was

going to solve a problem that did not exist, but then turned out to be the biggest economic fraud in the history of mankind.

Our lovely State and Order was in danger.

And so, this is why it was necessary to write this book: to prove, once and for all, that USD (and FIAT in general) is better than Bitcoin.

Conclusion

And this is why USD is better than Bitcoin.

If you think these are unequivocal reasons and you want to save your State, please take some useless bitcoin (BTC) and send it to this address:

3N9BxBfXRkchnhjnyCnvRPnrL7n4rpMEqV

**You will do your part for a better old
World.**
